As a user, I want to be able to see confirmations when tasks are done, so that I can confirm that they were successful.

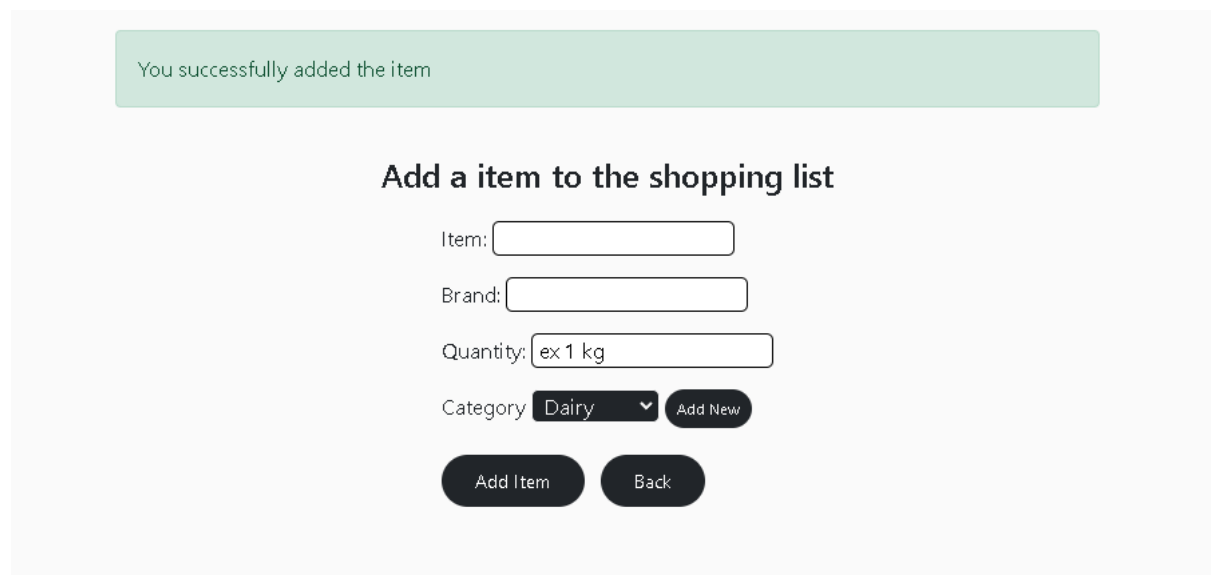

- All through the site when users add items, delete items, logs in, logs out, add categories or delete categories they get a message displayed on the screen.

You successfully added the item

As a user, I want to be able to add multiple items, so that i don't need to return to the list page every time and save time.

- When the user adds an item they stay on the add item page.

You successfully added the item

Add a item to the shopping list

Item:

Brand:

Quantity:

Category: Dairy [Add New](#)

[Add Item](#) [Back](#)

As a user, I want to be able to add a brand to my item, so that I specify what item I want.

As a user, I want to be able to add a quantity to my item, so that I know how much I need.

- The user can add a brand to the item with free text as an option.
- The user can add quantity to the item with free text as an option.

Add a item to the shopping list

Item:

Category: Dairy ▼

Update Item Back to Shopping List

As a user, I want to be able to add my own categories, so that i personalize it after my needs.

As a user, I want to be able to manage my categories, so that I can add more and delete the ones I don't want anymore.

- The user can access the manage category page to add new or delete old categories.

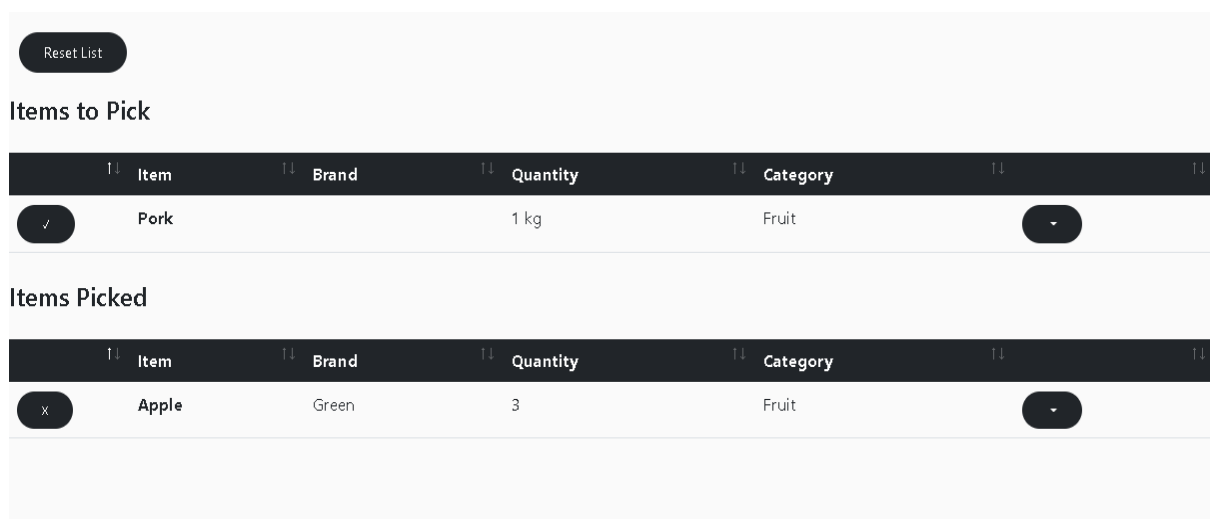

The image shows a web interface titled "Categories". At the top, there is a form with the label "Category:" followed by a text input field and a dark "Add" button. Below this, there is a list of existing categories: "Dairy", "Frozen", "Fruit", "Meat", and "Vegetables". Each category name is followed by a dark "Delete" button. At the bottom of the list, there is a large dark button that says "Add items to shopping list".

As a user, I want to be able to toggle the items as I pick them up, so that I can see what items are left to pick.

As a user, I want to be able to sort my list the way I want, so that I can specialize it after my needs.

- The user can toggle items with the leftmost button then picked, or toggle back the item if it's pressed by accident.
- With the arrows in the table head the user are able to sort each row

The image shows a shopping list interface. At the top left, there is a dark button labeled "Reset List". Below it, the section is titled "Items to Pick". This section contains a table with the following columns: "Item", "Brand", "Quantity", "Category", and a toggle button. The first row of data shows "Pork" with a quantity of "1 kg" and category "Fruit". The toggle button is a dark circle with a white checkmark. Below the "Items to Pick" section is the "Items Picked" section, which also contains a table with the same columns. The first row of data shows "Apple" with a quantity of "3" and category "Fruit". The toggle button is a dark circle with a white 'x'.

Item	Brand	Quantity	Category	
Pork		1 kg	Fruit	✓

Item	Brand	Quantity	Category	
Apple	Green	3	Fruit	x

As a user, I want to be able to delete the list, so that i can start from scratch the next time.

- Users can reset the whole list by pressing the reset list button.
